

GAMELOOP & BGMI SETUP GUIDE

Comprehensive installation, configuration, and launch protocol via Fusion

Youtube Video Guide: COMING SOON (EASY ONE)

PHASE 1: GAMELOOP & ENGINE INITIALIZATION

1 Download & Install GameLoop

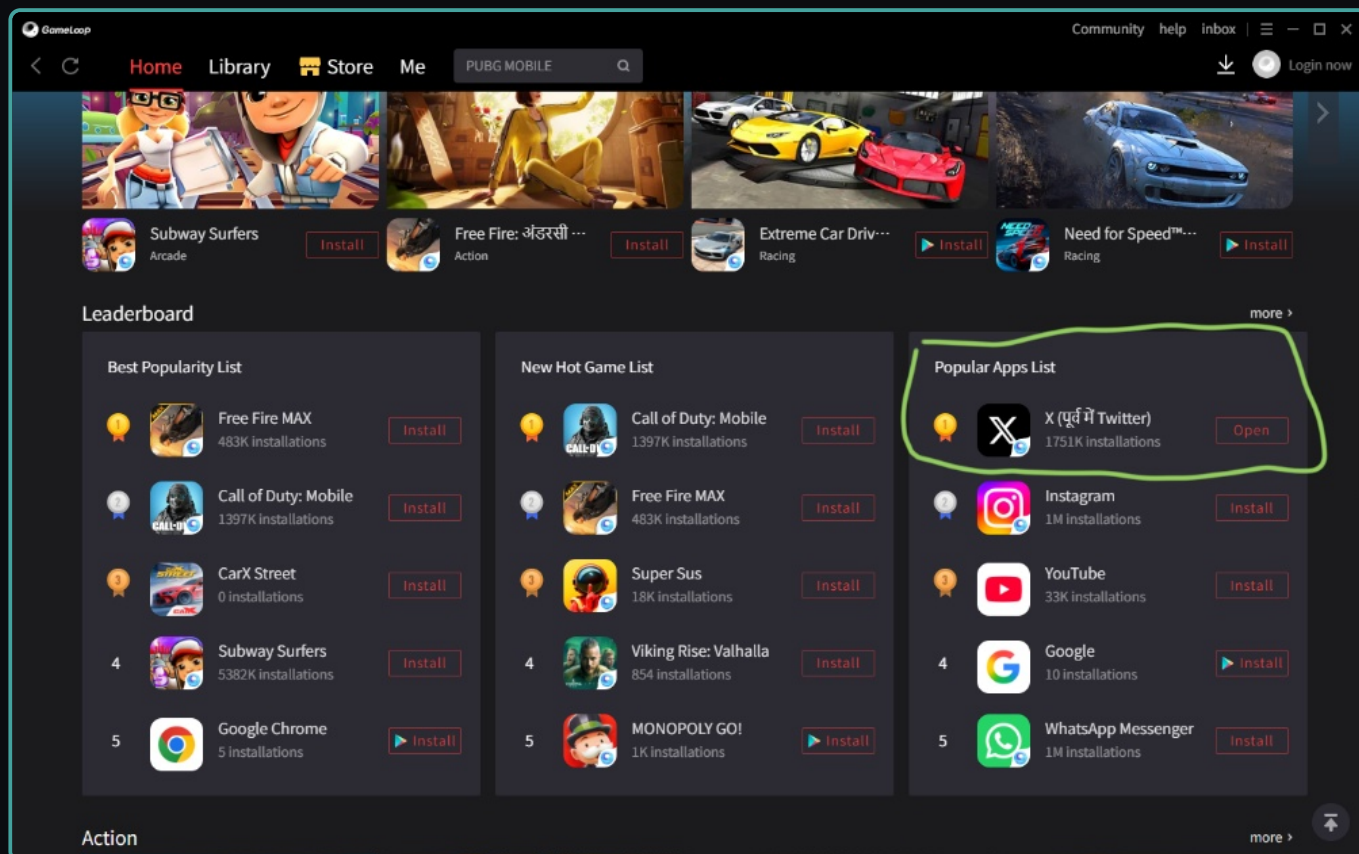

- **Fusion VIP user: 32bit Gameloop**
- **Fusion Free User: 64 Bit Gameloop**

Note: VIP users can play on both 32bit and 64bit versions.

2 Install the Required Engine via X

- Open GameLoop and navigate to the App Market.
- Search for and download X (formerly Twitter).

⚠ Mandatory Step: This is not optional. Installing X forces GameLoop to download and install the underlying engine required to run BGMI.

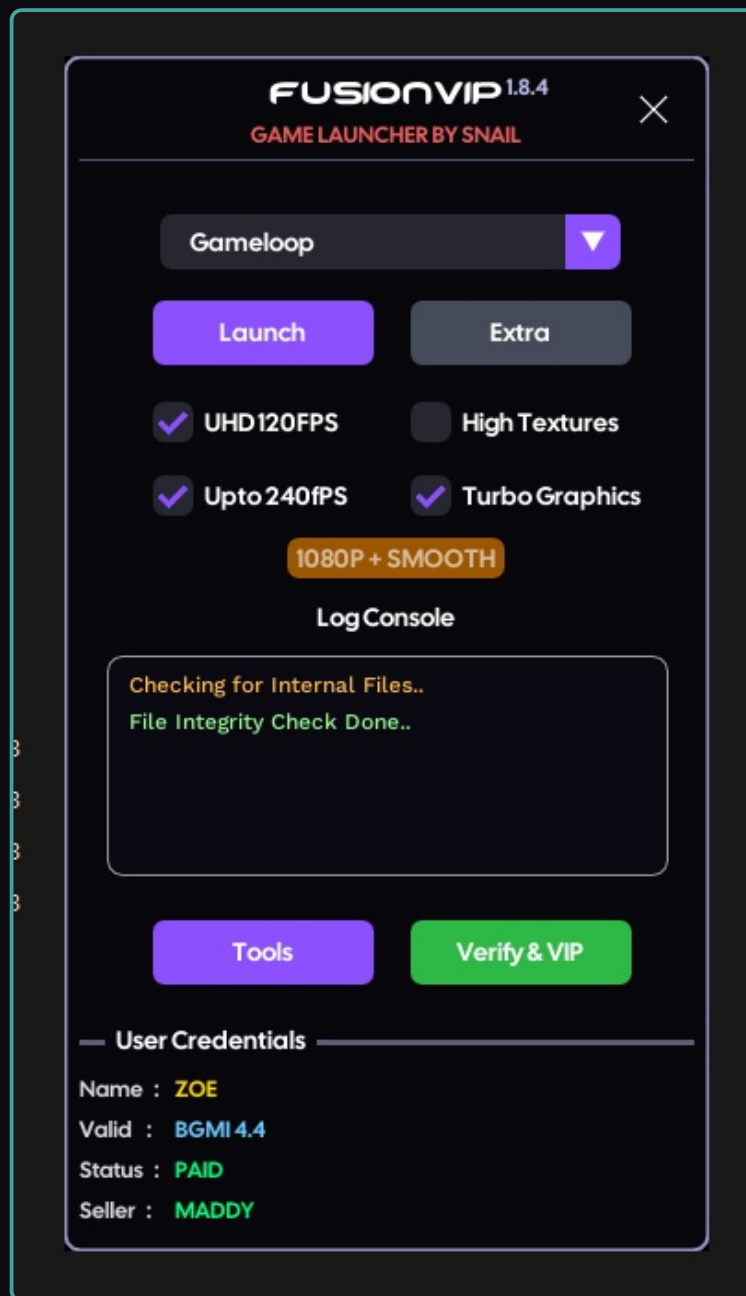

3 Close GameLoop Completely

- Once X is fully installed and opens on your screen, close X and exit GameLoop entirely.
- Make sure it is not minimized in your system tray.

PHASE 2: FUSION LAUNCH & BGMI INSTALLATION

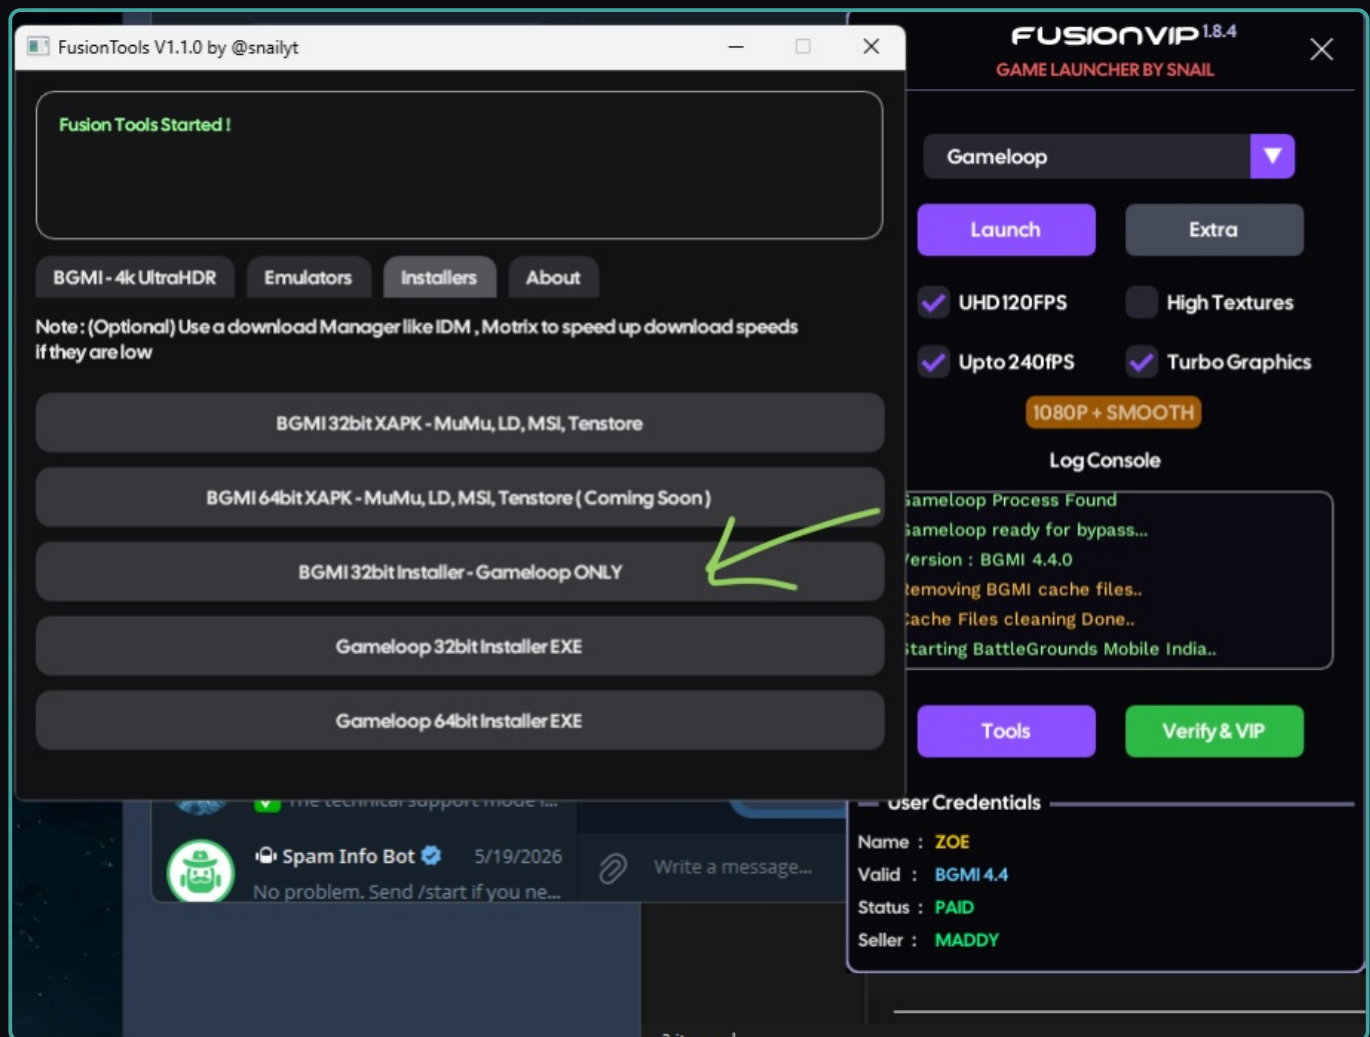

4 Launch GameLoop via Fusion

- Open the **Fusion** application.
- Click "**Launch**" to start GameLoop from within Fusion.

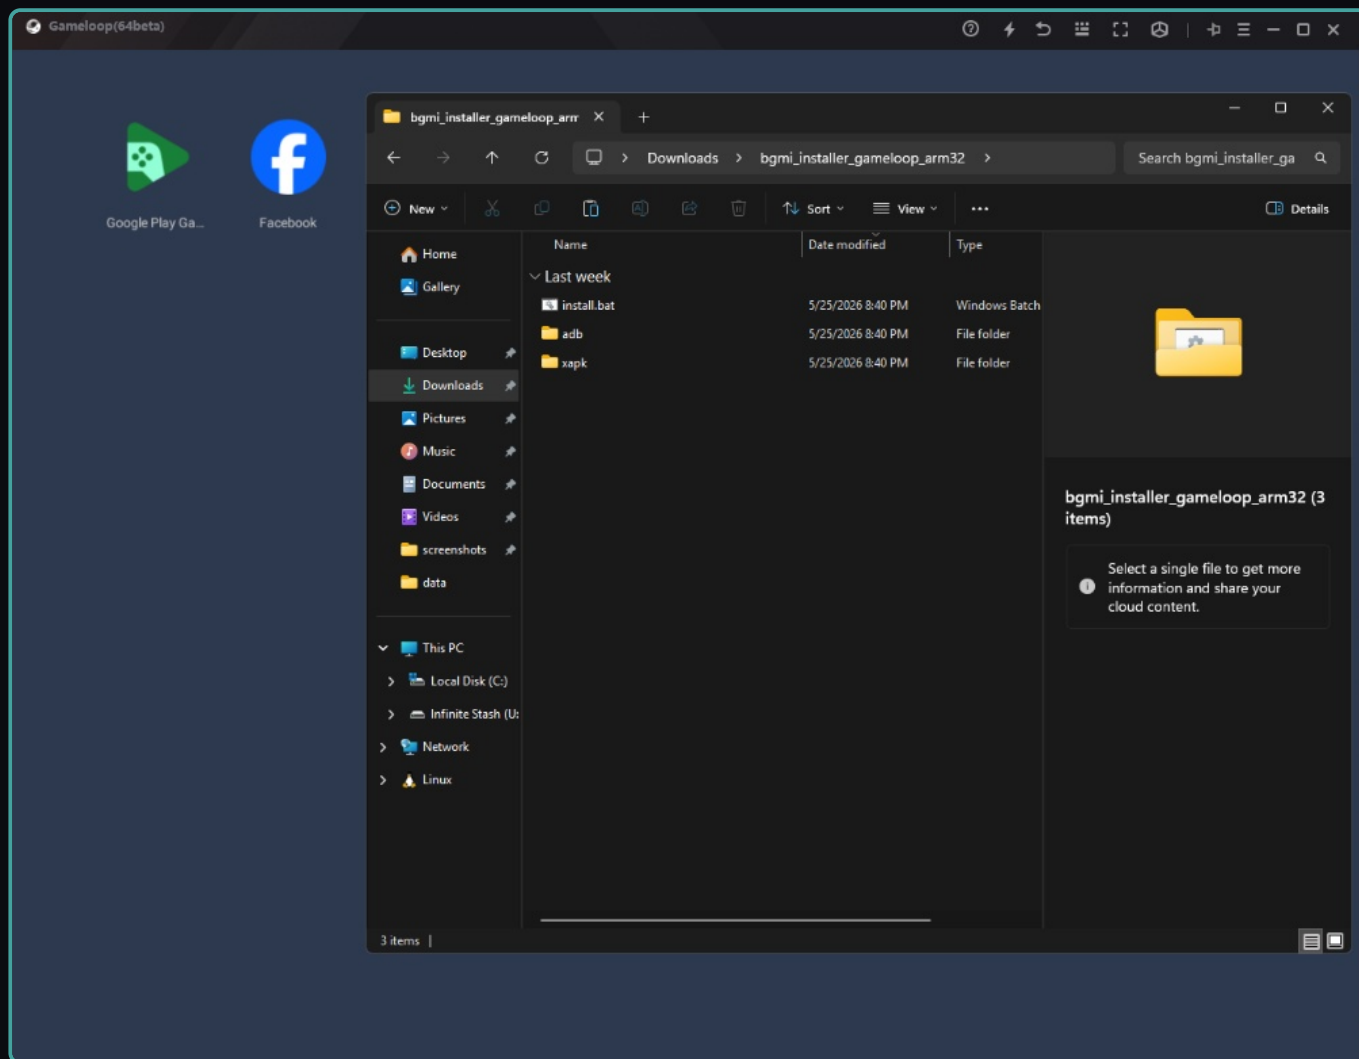

5 Run the BGMI Installer

- Ensure GameLoop is running via Fusion.
- Locate the **BGMI Installer** from Tools → Installations inside Fusion.

- Extract the installer files to a known location.
- Run the **install.bat** file.

⚠ Crucial: Make sure to show the GameLoop engine in the background when clicking **install.bat**! Do NOT close GameLoop while the .bat file is running.

PHASE 3: RESOURCE DOWNLOAD & FINAL LAUNCH

6 Download In-Game Resources

- Open BGMI normally within GameLoop.
- Download all required in-game resources.

7 Restart Sequence

- Click **OK** when "The update has been finished..." appears.
- Close GameLoop completely.

8 Final Launch

- Open Fusion one last time and click "**Launch**".

 **Setup Complete!**

ADDITIONAL CONFIGURATIONS

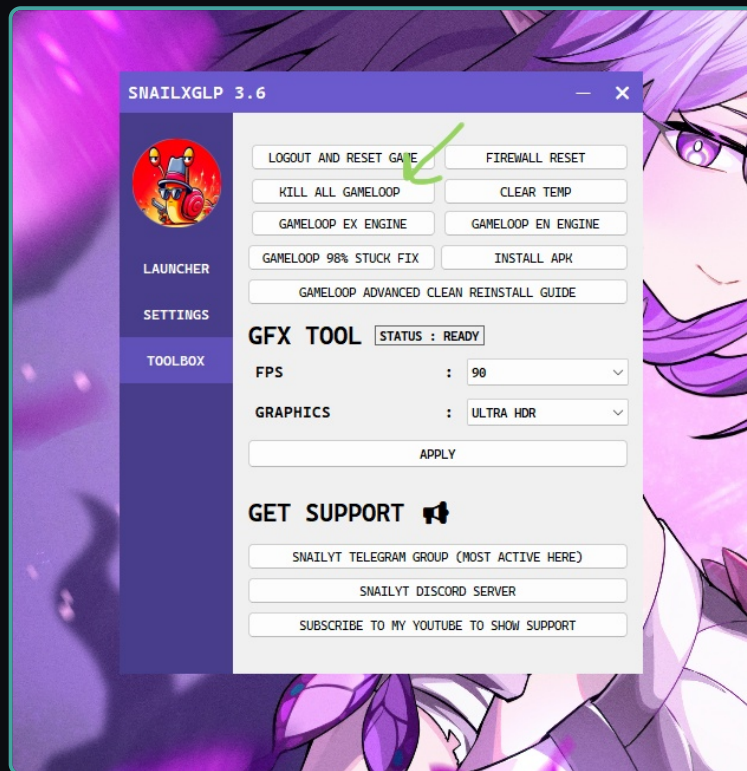

Keymapping Setup

Keymapping Video Guide: [Watch Video Guide](#)

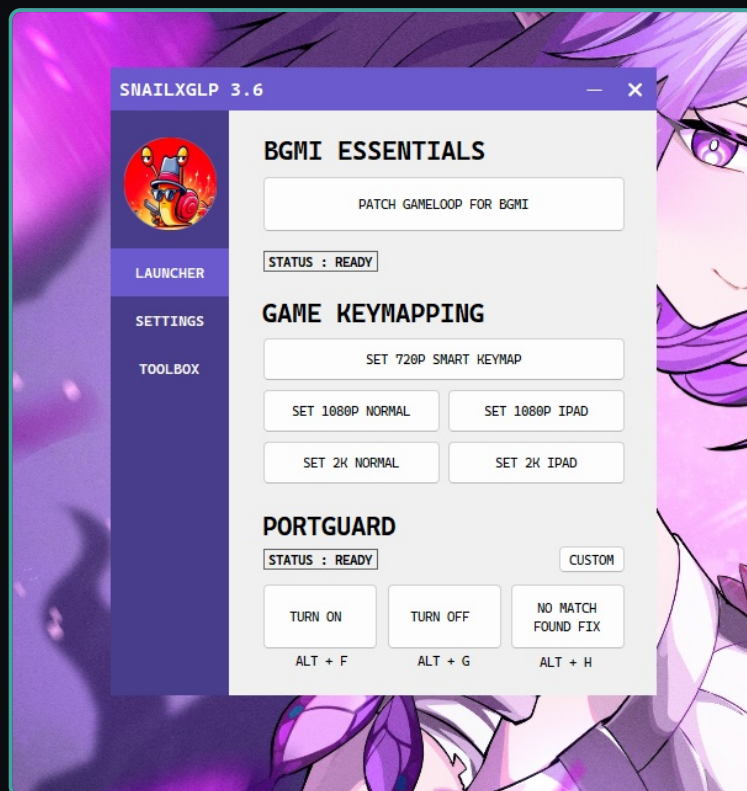

- Navigate to Tools in Fusion and click **Download SNAIL GLP TOOL**.

- Open `snailyt.exe`, go to Toolbox, and **KILL ALL GAMELOOP** processes.

- Set your keymap according to your display resolution under the **Launcher** section.

Play Store Access & Troubleshooting

- On the GameLoop home screen, press **F9**.
- Open Browser -> Search "Playstore" -> Sign in.

Network Issues?

If you experience connection drops, try resetting your Windows Firewall.

Experiencing Low FPS or Fluctuations?
